

AN AGILE NETWORK BY HPE.

ORCHESTRATION BY CDW.

A network operating at peak performance frees up your IT staff so they can focus on what's really important, like helping your organization meet its goals and objectives. Whether virtualization, mobility or cloud computing, CDW can help you build a network that keeps you ready for the future. As the **top HPE Networking partner in North America**, we can put tailored networking solutions together that are designed to reduce complexity, increase flexibility and support your new data center and enterprise demands.

HEWLETT PACKARD ENTERPRISE (HPE) GETS NETWORKING

A Better Wired Network

Hewlett Packard Enterprise's world-class switches and wired networking solutions give you a more productive working environment through dependable connectivity and improved user experience. HPE's Intelligent Management Center (IMC) provides single-pane visibility and manages any open standards platform across your entire network. Create a more integrated and centralized network with these HPE technologies:

- FlexBranch
- FlexCampus

Wireless Enablement

As enterprise mobility increases, so does the risk of data exposure. This makes your wireless access essential to protecting your network. With the recent acquisition of Aruba® Networks, HPE has bolstered its position as an enterprise networking leader in the wireless space. HPE is now capable of seamlessly integrating wired and wireless networks, regardless of the manufacturer, with newly acquired technologies such as:

- Aruba AirWave®
- Aruba ClearPass

SDN – Future Proofing

Networks today are complicated. They demand agility, simplicity and control over high-bandwidth applications, as well as the ability to scale with cloud-based services. HPE offers software-defined networking (SDN) solutions to make daily management easier. You can automate application deployment and integration while shifting more of your time and resources to focusing on the future. HPE supports OpenFlow 1.3 and offers various tools to help you reap the benefits of SDN, including:

- HPE's SDN App Store
- HPE Appliance and Virtual Controllers

CDW GETS HPE

CDW can build and implement a strategy designed to fit your wireless networking needs. With a wealth of HPE knowledge and years of experience, our experts can help you put a plan together and guide you through every phase of implementation and management.

PEOPLE WHO GET IT

Our HPE Networking experts can put solutions together that help you build and manage an efficient network. Along with your dedicated account manager, CDW offers a team of HPE resources. Together we can optimize your network's performance and increase availability.

BRINGING IT ALL TOGETHER.

When it comes to building a comprehensive networking solution, we're here to help. We offer a practical approach and guidance when integrating your networking components into a solution with a wide range of end-to-end services designed to support your organization.

OUR NETWORK STRATEGY

Our deep commitment to our partnership with HPE gives us a stronger understanding of how to apply their solutions. This allows you to get the most out of your wireless network and your investment. We can assist you at every step of your solution with full lifecycle support:

Design

We offer onsite wired and wireless survey and design, remote predictive modeling, coverage and redesign of your network.

Implementation

We'll walk you through hardware and software configuration, migration planning and testing proof-of-concepts, and provide knowledge transfer.

Optimization

Our coverage validation, RF and security assessments will ensure performance is boosted and applications operate smoothly.

Management

Long after implementation we're available to meet your ongoing needs with post-sales support and extended warranty, project management and managed services.

END-TO-END MOBILITY SOLUTIONS

To save you time, free up your resources and help your IT team focus on meeting your organization's goals and objectives, we offer:
