

# HPE SERVERS AND STORAGE: PORTFOLIO AT A GLANCE

### **April 2020**

### **OVERVIEW**

- View the HPE server and storage portfolio at a high level
- Find the right products to drive infrastructure transformation
- Compare key specifications across the product line

### TRANSFORM IT WITH SOFTWARE-DEFINED INFRASTRUCTURE

Cloud is not a destination; it's a model for a better way of doing things. To ensure your private cloud experience mirrors that of the public cloud, you need a partner who can help you build private clouds and manage hybrid cloud successfully, with the flexibility to adapt to changing business needs, by transforming your technology, people, and processes and economics. HPE is uniquely positioned to accelerate your hybrid cloud strategy through world-class software-defined IT solutions, proven hybrid cloud expertise, and flexible consumption and economic options—all supporting your choice of clouds, workloads, and tools. hpe.com/us/en/solutions/data-center-infrastructure.html

### HPE SYNERGY

Gain efficiency and control, and deploy IT resources guickly for any workload through a single interface. HPE Synergy, a powerful software-defined solution, enables you to compose fluid pools of physical and virtual compute, storage, and fabric resources into any configuration for any application. Learn more at hpe.com/synergy

### THE HPE SERVER FAMILY (hpe.com/servers)

### Innovation based on standards

Fundamental to establishing a converged infrastructure are your underlying platform choices. Whether it is a departmental server, an enterprise data center, or anything in between, HPE is committed to meeting your exact needs. Only HPE has the breadth of innovation, open partnerships, and depth of expertise to bring it all together.

### Our portfolio includes:

**HPE ProLiant servers**—The world's most secure industry standard servers,<sup>1</sup> HPE ProLiant Gen10 servers coupled with HPE OneView, HPE InfoSight, and HPE OneSphere deliver software-defined compute to accelerate application performance, infrastructure and application deployment, and improve server operations. Our wide selection of multicore, multiprocessor servers, and server blades meet needs ranging from those of cost-sensitive growing businesses to the performance and scalability demands of global enterprises. ProLiant servers support the industry's leading operating systems and applications for data centers of all sizes. hpe.com/info/proliant-dl-servers, hpe.com/info/towerservers, hpe.com/info/blades

HPE BladeSvstem—HPE BladeSvstem lets you transform legacy infrastructure and scale business performance while optimizing costs. With the powerful HPE OneView management, BladeSystem puts your business on an agile, secure foundation and on the path to a composable experience. hpe.com/info/bladesystem

HPE Apollo—The HPE Apollo high-density server family is built for the highest levels of performance, scale, and efficiency. They are rack-scale compute, storage, networking, power and cooling—massively scale-up and scale-out solutions, ideal for your Big Data analytics, object storage, high performance computing (HPC), and artificial intelligence (AI) workloads. hpe.com/info/apollo

HPE Mission Critical Solutions—When you need real-time business and maximum uptime, HPE Mission Critical Solutions are your ideal choice. This portfolio is unparalleled for its resiliency, availability, and security for mission-critical environments where business continuity is expected.

For industries that never stop, HPE NonStop Systems are uniquely designed for the very highest level of availability: an integrated solution stack with massive scalability, data integrity, and low TCO. hpe.com/info/nonstop. For your most demanding and critical SAP HANA®, Oracle and SQL Server workloads, HPE Superdome Flex delivers an unmatched combination of performance, availability, and reliability for mission-critical environments of any size. This is also an ideal platform to tackle AI and HPC workloads holistically. hpe.com/superdome. For workloads vital to your enterprise, HPE Integrity i6 servers with HP-UX are designed for always-on business: a highly integrated UNIX<sup>®</sup> system delivering mission-critical availability, stability, and predictable performance. hpe.com/info/hpux.

**HPE Server Options**—Strengthen the foundation of your data center with high-caliber products that enhance system performance and functionality. HPE memory, drives, processors, racks, and power and cooling offerings are easy to manage and are tailored for ProLiant, Integrity, and HPE storage systems. With HPE Qualified Options, you can be confident in your whole infrastructure. hpe.com/info/serveroptions

HPE Data Center Network solutions—Built from HPE FlexNetwork Architecture, HPE Data Center Network solutions meet the demanding needs of today's highly virtualized, large-scale application environments. HPE FlexFabric Data Center is the network foundation for the servers, storage, and software of converged infrastructure. This robust networking foundation helps you improve service levels and agility, enhance business continuity, and reduce operating costs. hpe.com/networking/datacenter

Partner Software—HPE tests, certifies, and supports a broad range of partner OS and virtualization software on HPE ProLiant servers. HPE resells and provides service and support for Microsoft Windows Server, Red Hat® Enterprise Linux®, SUSE Linux Enterprise Server, Canonical Ubuntu Server, and VMware<sup>®</sup>. HPE also resells Cloudera, Hortonworks, Scality, and Cleversafe with support provided by the partner. For more information, visit the OS and Virtualization website. hpe.com/info/ossupport

HPE Server Management is an agile infrastructure management solution for accelerating IT service delivery and support. We provide a comprehensive set of server management capabilities designed to manage the lifecycle for the HPE Server portfolio to reduce the time, complexity, and cost of everyday IT management. hpe.com/us/en/servers/management

### hpe.com/info/rackservers

hpe.com/info/towerservers Security Benchmarks

# HPE MOONSHOT SYSTEMS

HPE Moonshot is an integrated, workload-optimized, software-defined server system, delivered in a compact, energy efficient form factor. Moonshot infrastructure design delivers breakthrough efficiency and scale by replacing general purpose computing with more energy-efficient System-on-Chip (SoC) containing integrated accelerators tailored for specific workloads. This enables better resource efficiency, while reducing operational cost and improving IT set up and maintenance simplicity. For more information: hpe.com/info/moonshot

# HPE EDGELINE CONVERGED EDGE SYSTEMS

HPE Edgeline Converged Edge Systems is the industry first product category that combines uncompromised IT systems (Intel® Xeon® compute, storage and management) with Operational Technology (OT) Systems (control systems, data capture and industrial networks) in a ruggedized form factor capable to run analytics in virtually any edge environment. HPE Edgeline enable new applications and deliver dramatic improvements in operating cost, speed, reliability and security, while saving time, space, and energy. For more information: hpe.com/info/edgeline

# HPE POINTNEXT SERVICES

### Achieve maximum return from your IT investment

Get the expertise you need at every step of the IT journey with HPE Pointnext Services and Support. We help you lower your risks and costs using proven best practices, automation, and methodologies that have been tested and refined by HPE experts through thousands of implementations and deployments globally. With Advisory Services, we focus on your business outcomes and goals, partnering with you to design your transformation and build a road map tuned to your unique challenges. Our professional, operational and technical services can be leveraged to speed up time-to-production, boost performance, and accelerate your business.

HPE Pointnext Services specializes in flawless and on-time implementation, on-budget execution, and creative configurations that get the most out of software and hardware alike. We collaborate with your IT team from technical design to implementation, build to migration, distribution, and finally to operational consulting and service.

- and augment your IT staff for projects.

systems

Consume IT services on your terms, getting the specific value that you need for your business. HPE GreenLake enables you to scale easily by adding capacity in minutes, not months. You pay only for what you actually need, creating true pay-per-use outcomes. Simplify your IT planning, capacity forecasting, and cost allocation with HPF GreenLake

· Integration and performance services provide resources to help you get your systems up and running quickly

HPE Foundation Care provides fast problem resolution with comprehensive coverage and access to experts.

HPE Proactive Care provides proactive problem prevention and an enhanced support experience for your

 HPE Datacenter Care helps businesses run their IT operations by optimizing day-to-day tasks, integrating technology management and streamlining to a more agile cloud-like model.

## HPE PROLIANT SERVERS—10, 100, 300, 500 SERIES

# THE HPE STORAGE FAMILY

HPE delivers an intelligent data platform that predicts and prevent issues across your full IT stack with the ability to learn and self-adjust in real time. Hybrid by design, it makes your data accessible and usable across all cloud environments, turning your data challenges into business opportunities.

The Intelligent Data Platform by HPE is AI-driven, built for the cloud and delivered as a service:

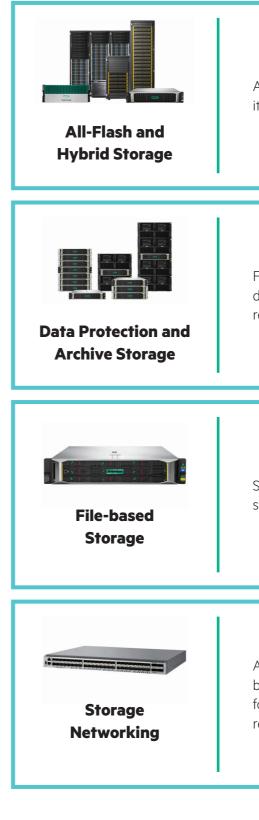

Al-driven: Reduce the burden of managing infrastructure and gain context-awareness of your data throughout its lifecycle.

Built for cloud: Run any workload, anywhere you need it with seamless data mobility and native integration to public cloud.

As a service: Pay-per-use elastic capacity that grows ahead of your business, delivered as a service on-premises.

Explore how your enterprise might take advantage of intelligent storage to meet the dynamic challenges ahead.

- (New) HPE Primera: The world's most intelligent storage for mission-critical apps<sup>2</sup> that delivers extreme resiliency and performance with the agility of the cloud. Powered by the intelligence of HPE InfoSight, HPE Primera delivers instant access to data with storage that sets up in minutes, upgrades transparently, and is delivered as a service. Plus, it's backed by a 100% availability guarantee.<sup>3</sup>
- (New) HPE Nimble Storage dHCI: HPE Nimble Storage dHCl is an intelligent platform with the flexibility of converged and the simplicity of HCl. Built with HPE ProLiant and HPE Nimble Storage, this platform provides the flexibility to scale compute and storage independently for unpredictable growth and the data resiliency and performance needed for business-critical apps.
- Hardware consists of HPE Nimble Storage AF and HF platforms, and HPE ProLiant DL360 and DL 380. Please refer to the HPE Nimble Storage and HPE ProLiant sections for more information.
- HPE MSA Storage: Flash-enabled arrays that raise the entry storage bar, making application acceleration possible for a wide range of budgets.
- HPE StoreEasy: A leading NAS product family under \$15K USD, which is an easy-to-manage centralized, space for securely storing documents, images, audio, and video files.
- **HPE Nimble Storage:** HPE Nimble Storage leverages flash storage and predictive analytics to eliminate the gap and guarantee 99.9999% availability, delivering the best all-flash capacity per TB in the industry—and future-proofing design for value today and tomorrow.
- HPE SimpliVity: An enterprise-grade hyperconverged platform that speeds application performance, improves efficiency and resiliency, and restores VMs in seconds.
- HPE 3PAR StoreServ Storage: Tier 1 all-flash data storage array that can scale from midsize to the largest enterprises and service providers, enabling high service levels and instant application provisioning.
- HPE XP8: Designed for applications requiring 100% data availability, the HPE XP8 Storage combines a seven-nines platform (99.99999%) of fully online, scalable, and redundant hardware, with ultra-high-performance, and advanced data replication, and disaster recovery (DR) along with online data migration capabilities.
- HPE StoreOnce: Intelligent storage that transforms your hybrid cloud data protection with greater simplicity, performance and agility at lower cost than traditional solutions.
- HPE StoreEver: As your business's data continues to grow, trust HPE proven tape solutions to retain your valuable data for longer and for less.
- HPE StoreFabric: HPE StoreFabric modernizes your storage network with a broad selection of trusted products focused on performance, SAN automation, and resiliency solutions.

<sup>2</sup> HPE Storage Substantiation <sup>3</sup> HPE 100% Availability Guarantee All-flash and hybrid storage with intelligence that makes it smarter and simpler to use.

Flash storage-integrated, built-for-cloud data protection delivering unparalleled backup, archive, and disaster recovery for your enterprise apps.

Secure, tailored, and economic solutions to address storage requirements for NAS and file-based storage.

A superior storage networking experience with a broad selection of trusted HPE StoreFabric products focused on performance, SAN automation, and resiliency solutions.

### **HPE PRIMERA**

New

The HPE Primera 600 series redefines what's possible in mission-critical storage by delivering the agility of the cloud while raising the bar on resiliency and performance. Built upon proven resiliency and powered by HPE InfoSight, HPE Primera delivers instant access to data with storage that sets up in minutes, upgrades transparently, and is delivered as a service.

### • HPE 3PAR StoreServ File Controller provides an efficient, bulletproof, and

ess way to provide file services from any model of HPE 3PAR StoreServ Storage.

enorm	ess way to provide th	e services normany model of the SPAR Storeserv Storage.					
		Intel Xeon E5-2609 v3 (1.9 GHz/6-core/15 MB/85W) Processor (SKU K2R67A)					
cessor/Cache Memory		Intel Xeon E5-2609 v4 (1.7 GHz/8-core/15 MB/85W) Processor (SKU Q0F57A)					
	Type Standard	DDR4 Registered (RDIMM) standard 32 GB (4 x 8 GB)					
ory	DIMM Sockets	16					
ork Iler	NIC Ports	2 x 1GbE					
ge	Controller(s)	HPE Dynamic Smart Array B140i Controller					
ller	RAID	0, 1, 1+0, and 5					
	Hard Drives	24 x 2.5" (Small Form Factor) hot plug bays in the HPE 3PAR StoreServ File Controller v3 System chassis					
ge	(Internal)	$2 \times 6 \mathrm{G}$ SATA Solid State Drives containing factory installed OS. Configured as RAID 1 mirrored pair					
	Hard Drives (External)	Designed for attach to Fibre Channel (HBA required), SAS (HBA required), or iSCSI (iSCSI initiator included) arrays					
Powe	r Supply	2 x 800W Platinum hot plug Power Supply (located in HPE 3PAR StoreServ File Controller v3 System chassis)					
Powe	er Cords	Note: The HPE 3PAR StoreServ File Controller v3 Systems are primarily connected to PDUs in data center racks and ship standard with a PDU 6-foot C14 to C13 power cord (142258–001)					
Syste	em Fans	8 (4+4 redundancy) non-hot plug in HPE 3PAR StoreServ File Controller v3 System chassis					
		HPE 3PAR StoreServ File Controller v3 System—2U rack mount chassis					
Form	Factor	HPE 3PAR StoreServ File Controller v3 Single Node—2U single slot tray (one or two nodes per chassis)					
		HPE 3PAR StoreServ File Controller WSS2016 v3 Single Node—2U single slot tray (one or two nodes per chassis)					

# XP8 Storage

**P8 Storage:** Resilient mission critical storage for enterprise applications at scale that enables optimize and deploy with extreme confidence.

# HPE STOREONCE

Hardware						Software				
New Description	HPE StoreOnce 3620 delivers entry-level disk-based backup and disaster recovery that's ideal for smaller remote or branch offices and data centers.	HPE StoreOnce 3640 delivers scalable backup and restore for small to midsized data centers, and provides an ideal replication target device for up to 36 remote and branch offices.		HPE StoreOnce 5250 offers disk-based backup with deduplication for longer term on-site data retention and off-site disaster recovery with best-in-class scalability and performance for larger midsize and enterprise data centers.	HPE StoreOnce 5650 offers disk-based backup with deduplication for longer term on-site data retention and off-site disaster recovery with best-in-class scalability and performance for larger midsize and enterprise data centers.	New		StoreOnce VS	A can be configure	As a software defined backup target, ed to provide the capacity and he data protection requirements. <b>To scale from minimum configuration</b>
